

Crane and Skull

Spreading the load

Ideally suited for the mobile crane market.

Advantages

- o Light weight - for ease of handling
- o Tough - resistant to loads of 100 tons/sq.m.
- o Versatile - wide range of shapes & sizes
- o Low cost - made in house
- o Safety - replaces old railway sleepers

High Impact Europlast 'T'

Europlast 'T' is ideal to replace metal parts in applications which require:

- high impact strength
- good modulus
- high abrasion resistance
- good chemical resistance

Applications include: pile driving caps or cushion pads, gears, valve seats, stabiliser feet for mobile cranes, impellers and pump parts.
