We generate **High pressure**

Lifting platform

Flexlift

Hydraulic torque wrench

Wren

Power pack

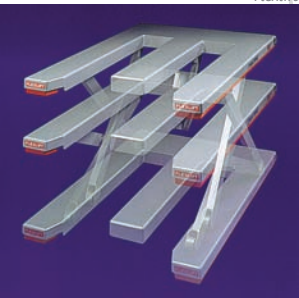

Seyer Elektromotoren

Civil Engineering

Enerpac

Clamping unit

Eckold

We regard 700 bar as high pressure. We offer an extensive product range of pumps, valves and accessories for this pressure range.

We build up your demanding hydraulic system.

Pumps

Single and multiple circuit radial piston pumps for operating pressure up to 700 bar, with a wide range of flow rates

- R D 6010 (Pump alone)
D 6010 H (Hydraulic power pack)

Max. operating pressure: 700 bar
 Max. delivery flow: 91.2 lpm

Dual stage pumps for efficient supply for creeping/rapid traverse of a consumer or for dual circuit systems

- RZ D 6910 (Pump alone)
D 6910 H (Hydraulic power pack)

Max. operating pressure: 700 bar (high pressure) / 150 bar (low pressure)
 Max. delivery flow: 91.2 lpm (high pressure) / 135 lpm (low pressure)

Compact hydraulic power packs

Single and dual circuit pumps, motor, tank and optional blower in one housing save space in your system or could easily be employed for a portable design

- For ON/OFF-operation

MP, MPN (Max. delivery flow up to 135 lpm)	D 7200, D 7200 H, D 7207
HC (Max. delivery flow up to 12.9 lpm)	D 7900
KA (Max. delivery flow up to 19.9 lpm)	D 8010

Max. operating pressure: 700 bar (high pressure) 180 bar (low pressure)

- For continuous operation

HK (Vertical version in 3 sizes)	D 7600-2, D 7600-3, D 7600-4
HKL (Horizontal version)	D 7600-3L

Max. operating pressure: 700 bar (high pressure) 180 bar (low pressure)
 Max. delivery flow: 12.9 lpm (high pressure) 24 lpm (low pressure)

Directional seated valves

Individual valves and valve banks with zero leakage for motion control

- 2/2-, 3/2-, 3/3-, 4/3- and 4/2-way ball seated valve with various actuations

Individual valves	D 7300
Valve banks	D 7302

Max. operating pressure: 700 bar
 Max. flow rating: 120 lpm

- 4/3- and 3/3-way ball seated valves with manual actuation VH D 7647

Max. operating pressure: 700 bar
 Max. flow rating: 25 lpm

Pressure valves

Various versions for safeguarding systems or maintaining a selected pressure difference

- Directly controlled pressure limiting valves MV, MVS, SVC, DMV D 7000/1

Max. operating pressure: 700 bar
Max. flow rating: 160 lpm

- Proportional pressure limiting valves PMV D 7485/1

Max. operating pressure: 700 bar
Max. flow rating: 120 lpm

Check valves

Check valves in sturdy and contamination insensitive design due to ball seated design

- RK, RB, RC D 7445, D 6969 R

Max. operating pressure: 700 bar
Max. flow rating: 120 lpm

- RHC, RH, HRP (releasable) D 7165, D 6105, D 5116

Max. operating pressure: 700 bar
Max. flow rating: 400 lpm

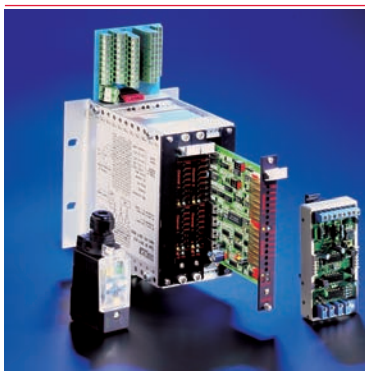

Accessories

Components to complete your controls

- Pressure switches D 5440, D 5440 E/1
- Electronic pressure transducer D 5440 T/1, D 5440 T/2

Max. operating pressure: 700 bar

Electronic controls

Intelligent electronics for user comfort and diagnostic functions with a wide range of capabilities

- Electronic amplifier EV D 7817/1, D 7831 D, D 7837
- Programmable logical valve control PLVC, with Profi-Bus interface D 7845-2, D 7845-4, D 7845 M D 7845 HMI

Latest developments of HAWE Hydraulik

- Compact hydraulic power pack HKL: Horizontal version saving space without compromises D 7600-3L
- Compact hydraulic power pack KA: Two sizes with optional blower for prolonged operation D 8010++
