Wind turbines

REpower

Paper coating

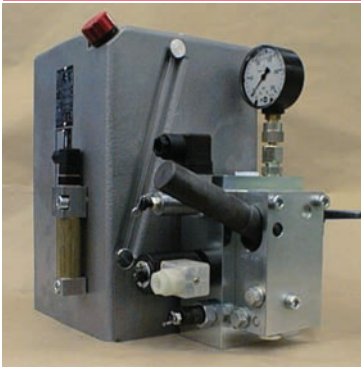

Pagendam

Special trucks

Kögel Kamag

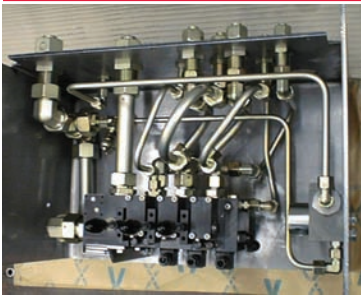

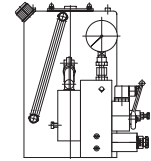

**Three things that are most important to us: You have one contact for all questions. Your regulations and wishes are important to us. We deliver Plug & Play-solutions.**

**Custom-designed control blocks**

No matter whether manifold or connection block – we meet your requirements.

- Individual valve blocks
- Valve blocks attached to standard power packs

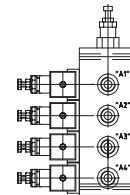

**Special pipe work required**

It is our speciality to minimize the pipe work. But all power packs and valves can be piped to meet your requirements.

**Even more space saved**

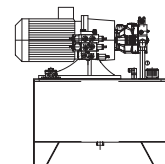

The design of our hydraulic system is really compact. But sometimes there can be done even more. For example:

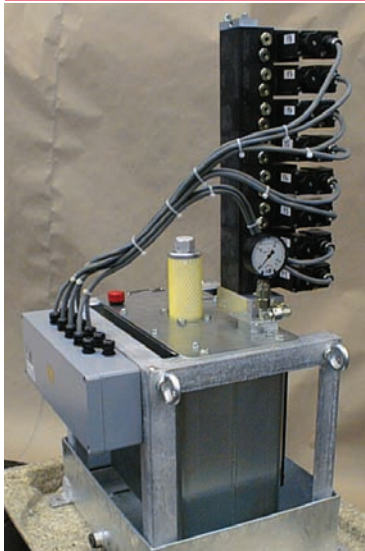

- Single block
- Laterally mounted motor
- Customized tank design

**Enameling for improved corrosion protection or just for better looks**

Our components feature already a surface protection against environmental influences. But we will paint according to your specifications.

#### Electric controls ready for operation

Our service includes the complete wiring and electrical connection. But normally it is really no problem to do it by yourself.

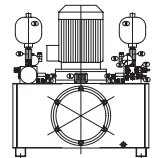

- Connection of the HAWE electronic control, which is harmonized with all hydraulic components
- Connection of the electronic controls provided by the customer

#### System solutions complete, tested and ready for operation

You will not find all products in our product range, but we will source all what might be needed to complete your hydraulic system.

- All kind of accumulators
- All kind of cylinders
- Radio controls, joy-sticks and other kind of actuations

#### Our offer

We build your system exactly according to your specifications - you just have to connect it. That's what we call Plug & Play. We are at your service right from the beginning. We support you while planning the system, creating the circuit diagram and blue prints, up to selecting the suited components. The electronic controls are integrated and adjusted. The whole unit gets tested and fine tuned after the system is assembled. We install the complete system if required.

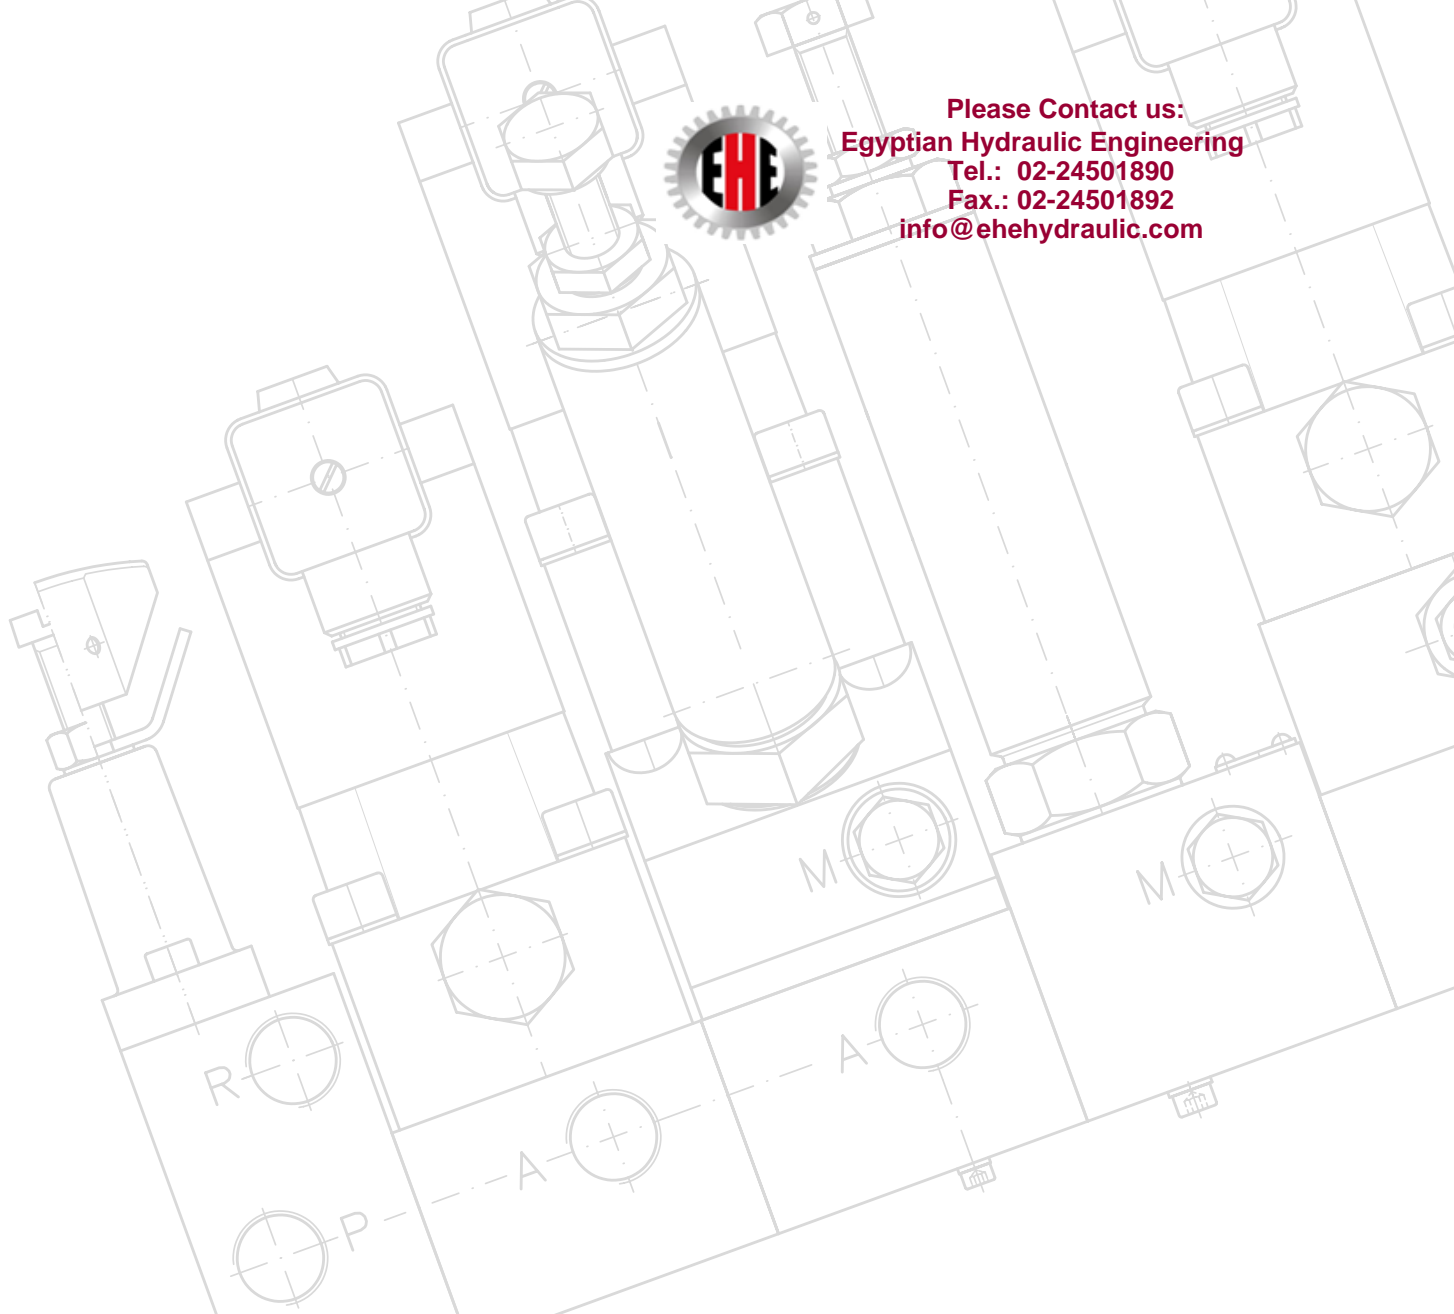

#### Additional information

- |   |        |
|---|--------|
| • Product overview with all our components                                | K 177  |
| • Listing of your contact in our sales offices                            | K 177  |
| • Pamphlets with detailed information for every product of HAWE Hydraulik | D .... |
